Game of Thrones Database
Patrick Gronstal
UW JS320B
Final Project

Wireframes for the design as well as each device are found within this document.

The main view will start as page 1 for all devices.  Each button will illustrate a viewable list or grid of items.

There may be the option implemented to select the list item and provide more detail as seen on page 6.
Fonts and colors have already been selected and will be added to application.
